

Flex Ice Mat™ and Flexible Ice Blanket™

Flex Ice Mat™

The Flex Ice Mat™ is a great choice for shipping large quantities or large masses of temperature-sensitive products that must remain cold for extended periods of time. With a freezing/melting point of 0°C, these mats stay cold and deliver a thermal barrier for superior protection against excessive hot or cold temperatures. They are scalable to adjust to the size of the payload and are packaged in durable materials to resist leaks.

Flexible Ice Blanket™

The Flexible Ice Blanket™ offers a design that can wrap around a payload, even when frozen, providing enhanced thermal protection of temperature-sensitive products. Ideal for a variety of applications, these blankets have a freezing/melting point of 0°C and stay cold without leaking or spilling. Whether using for a small product payload or wrapping a full pallet load, they are easily scalable to a wide range of sizes.
