

FIB & MAT

The Flexible Ice Blanket™ and Flexible Ice Mat™ can be wrapped around your payload to help stabilize temperature and minimize “dead zones” that are created by traditional gel packs. Applications include maintaining the payload in a refrigerated condition, or serving as a thermal buffer to help prevent a room temperature product from freezing.

These innovative refrigerants offer unparalleled flexibility in thermal transportation protection. Exclusively manufactured by Cryopak, the Flexible Ice Blanket™ and Flexible Ice Mat™ are offered in many standard sizes or can be manufactured to match customer size and weight specifications.

Avantages:

- ✓ Non-toxic and non-hazardous
- ✓ Provide shock absorbency
- ✓ Multiple standard sizes
- ✓ Packaged in durable plastic film
- ✓ Can be tailored at will by cutting between the pouches with scissors
