

Ice Pak 0°C

The Ice Packs are refrigerants more commonly known as eutectic plates or ice bricks. They are the most economical solution if you wish to reuse the cooling element.

The Ice Packs are more robust than the Gel Packs and therefore offer maximum security for your products. They are primarily used in the pharmaceutical and food industries. They freeze and defrost at 0°C.

Use of Ice Pak

The quantity of eutectic plates to be inserted into your packaging depends on your shipping criteria, such as storage temperature, product mass, transportation duration and external temperatures to which your packaging is subjected between it being shipped and it arriving at its destination.

Multiple sizes are available.

Advantages

- ✓ Our eutectic plates are food-grade quality. They contain 100% drinking water and are very easy to clean
- ✓ They can be delivered pre-frozen
- ✓ Reusable several times
- ✓ Deliverable in returnable trays for a more ecological solution
