

Cryopak

The Perfect Degree of Protection

Cold Chain Packaging Solutions

CryoArc Pre-Qualified Pallet Transporter

Transporting large volumes optimizes the cold chain maintenance performance because a greater mass of products increases their inertia and better protects them from temperature variations. The CryoArc Pallet Transporter is a very robust and lightweight isothermal pallet offering exceptional thermal performance for applications between + 2° / + 8°C or + 15° / + 25°C (CRT).

The CryoArc Pallet Transporter has been specially designed for the cold chain transport of pallets of heat-sensitive products for a transport duration of up to 96h / 120h. It was designed for air transport because 4 Pallet Transporters fit in a cookie sheet (ULD).

Once at its destination, it can be dismantled and reused.

We offer return logistics in place on several routes around the world in order to reuse packaging and eutectics.

Product Details

Item #	Product Name	Temperature Range	ID of Payload Box L x W x H (mm)			Payload Mass (ml)	Duration (hours)
FFPU0004	CryoArc Pallet Transporter-France	2-8°C	1200	1000	1145.6	10080 x 0.1	120
FPU00142	CryoArc Pallet Transporter-U.S. and Canada	2-8°C	1200	1000	1145.6	10080 x 0.1	120

CryoArc Pre-Qualified Pallet Transporter

The CryoArc Pallet Transporter is made from 2.5 to 6 cm polyurethane panels with a density of 48 kg / m³. Permanent stock is available to deal with seasonal peaks in your activity. The CryoArc Pallet Transporter can be delivered to you already assembled and ready for use: all you have to do is load your pallet of products.

The CryoArc Pallet Transporter can also be delivered disassembled (4 insulated pallets stacked) in order to optimize your storage space and optimize logistics costs: one person is enough to assemble it. It is offered on a wooden or plastic pallet specially selected to meet international regulations. We offer an optional outer cap.

The CryoArc Pallet Transporter is probably the easiest insulated packaging to load: position the eutectic plates in the slides provided, insert the pallet of products directly into the packaging, close the door, put on the outer cover and you're ready to ship.

We offer you a complete CryoArc Pallet Transporter kit with all the accessories and all the refrigerants necessary to maintain the temperatures of your products according to the duration of your transport and your temperature profile.
